

biography

Peter Liu

University of Ottawa and University of Toronto, Canada

Peter Liu is the Scientific Director of Brain-Heart Interdisciplinary Research, and former Chief Scientific Officer and Vice President of Research at the University of Ottawa Heart Institute. He is also Professor of Medicine at the University of Ottawa and University of Toronto. He was also the former Scientific Director of the Institute of Circulatory and Respiratory Health at the Canadian Institutes of Health Research (the major federal agency that funds all health-related research in Canada). He is also the co-lead of a new research program on Brain-Heart Interconnections, a \$109 million new research program funded by the federal government.

Professor Liu's research focuses on the pathophysiology and clinical outcomes of heart failure from bench to bedside, now linking brain-heart interconnections. He has published over 480 peer-reviewed articles in high impact journals, and received numerous awards in recognition of his research and scientific accomplishments.
